

LIVINGSTON COUNTY

FIRE TRAINING

Presents:

Tactical Imaging

Thermal Imaging for the Fire Service

Presented by: Safe-IR

This is your opportunity to learn how to use your thermal imager correctly in both classroom and live burn scenarios with emphasis on proper image interpretation.

Learn from a cadre of instructors who will offer you years of practical experience; not salesmen or factory reps, but firefighters from urban fire departments nation-wide! This course was developed by firefighters for firefighters with SAFETY in mind!

FIRST SESSION – CLASSROOM: May 30th at 1830hrs (all must attend)

- Brief history of Thermal Imaging
- Theory of Thermal Imaging
- Principles of Thermal Imaging
- Limitations of Thermal Imaging
- Safety
- Tactical Considerations
- Techniques of Navigation
- Care and Maintenance
- Hands-On Orientation

SECOND SESSION – LIVE FIRE APPLICATIONS: May 31st, June 1st & 2nd at 0900hrs

- **Pick any ONE (1) of these three days**
- Proper interpretation of the image and its relationship to firefighting
- Identify the limitations of the thermal imager and how to overcome them
- Navigation
- SAFETY
- Unit Familiarization
- Search and Rescue using thermal imager
